Installation instruction - Arc

1. Each bend is equipped with two bolts to be inserted in the middle section. Important to ensure that the softer side of the roof fall down.

2. Then place the supplied steel rods in the top of Offizz screen. The hole that will be used is the furthest out towards the edge on both sides. Two rods per screen.

3. Set out the screens with the right distance from each other. Then lift just on the roof of the upsticking steel rods. Make sure that the screens are vertical so that no roof presses the screen in any direction.

4. Ordered measures of Arc corresponds to the inner dimension between Offizz screens.
